

Mini Navigator 900

2.4GHz BlueEye Tracking Mouse for laptops

- 2.4GHz radio frequency minimizes interference and extends the working distance up to 10 meters. Mini Pico receiver is easy to plug and carry.
- Up to 10 meters working distance
- BlueEye Tracking is a powerful optical engine with high laser precision that lets you work almost anywhere. Suitable for either hand and comfortable to grip.
- Power Switch extends battery life.
- Storable receiver slot.

Genius lets you experience great cursor control with the Mini Navigator 900 which uses the latest BlueEye Tracking technology. BlueEye Tracking technology is a powerful optical engine with high laser precision that lets you work almost anywhere and the lens design reduces the power consumption.

The 2.4GHz anti-interference RF technology extends the operating range up to 10 meters and lets you enjoy wireless freedom. Plus, the Pico receiver is small enough to leave it your notebook when you're moving around the office. Mini Navigator 900 is now available in four colors: Steel Blue, Black, Blue and Ruby, so pick one that matches your notebook. Contact your sales representative now where you can find Mini Navigator 900.
